

MotionX-GPS

MotionX-GPS

Apple Watch

Getting started with using MotionX-GPS on your Apple Watch

After installing MotionX-GPS on your iPhone, the app will automatically install on your Apple Watch if you have the "Automatic App Install" feature turned on in the Watch app.

If you'd like to enable the "Automatic App Install," launch the Watch app > tap My Watch > General, and then toggle ON the feature.

If you do not use the "Automatic App Install" feature, continue the tutorial.

Select the globe on your Apple Watch to launch MotionX-GPS.

You are now ready to use MotionX-GPS on your Apple Watch.

Note: MotionX-GPS on the Apple Watch relies on the GPS signal from your iPhone. Ensure Bluetooth and Wi-Fi are on and your iPhone is within 30 feet of your Apple Watch when in use.
